Jennifer Zola BSN, RN presents:

The Truth about Surgical Asset Automation…Can it Really Help the OR?

Sponsored by:
Thursday, August 11, 2016, 2:00pm ET

PRESENTER: JENNIFER ZOLA, BSN, RN

Jennifer is a Sales Consultant for Censis Technologies. She has 20+ years of healthcare experience in a variety of hospital settings including medical/surgical nursing, patient/staff education, and clinical sales support of medical device solutions.

**Webinar Agenda:** During this 60-minute presentation, participants will learn about the tools available to help support and improve OR management using surgical asset management systems. Jennifer will review required documentation and processes, discuss what could be missed manually, cover where automation brings value, and close with how to choose a partner.

The truth about surgical asset automation…
Can it really help the OR?

If you had to pinpoint the high level goals of instrument and tray reprocessing from the OR Department’s perspective, the list would probably include:

1. On-time delivery to the OR
2. Tray accuracy
3. Tray status and location transparency
4. Regulatory compliance

To accomplish these goals on a day-to-day basis, there is no doubt it takes cross-department teamwork, great communication, and effective leadership. Additionally, there is a case for using instrument management automation solutions to help support the efforts involved in being successful. To understand the impact automation can make, it is important to drill down into the details involved in instrument reprocessing.

This presentation, “The truth about surgical asset automation…Can it really help the OR?”, discusses the following:

• Challenges the Central Sterile Supply Department (CSSD) must navigate in order to meet requirements and expectations,
• Current regulatory changes and trends that can have an impact on reprocessing goals, and
• Specific details on how automation can make a difference.

Instrument tracking solutions have been around for over a decade. There is a lot of information on how these solutions benefit the CSSD, but what does automation mean for the OR? Join us to learn how surgical asset management automation can make a positive difference in the OR.
